## The Eaton 3105 UPS — Dependable. Diligent. Dedicated.

The Eaton® 3105 UPS provides affordable, essential battery backup and surge protection for basic small office/home office equipment — anytime reliable power is needed.

### Eaton 3105 features and benefits:

**Compact design:** The 3105 fits neatly under a desk and can be wall-mounted for additional space savings.

**Reliable power protection:** The cost-effective 3105 features eight outlets, four with surge protection and battery backup and four with surge protection only. Save battery life by plugging less-critical equipment into surge-protection-only outlets.

**Data line protection:** Safeguard equipment — such as fax machines, modems or electronic telephones — from back-door power surges coming through network or phone wiring.

**User-replacable battery:** When the LED and audible alarms indicate the battery needs replacing, you can safely and easily install a new battery — no tools required.

### Intelligent Power Protector

By combining Eaton's Intelligent Power® Protector software with the 3105, you can monitor and manage all of the power devices on your network. You can even enable graceful shutdown of computers during an extended power outage.

### Services and support

Eaton provides product support 24 hours a day, 7 days a week. From battery replacement to full service plans, Eaton is one of the top service models in the industry.

### Three-year warranty

The 3105 warranty covers both the UPS and the battery for three years. No other manufacturer in the industry offers as comprehensive a warranty.

### Battery runtime

The 3105 provides up to 45 minutes of battery backup. For a detailed interactive battery runtime chart, please visit: [www.eaton.com/3105](http://www.eaton.com/3105) — then view the individual technical specifications pages for details of each unit.
